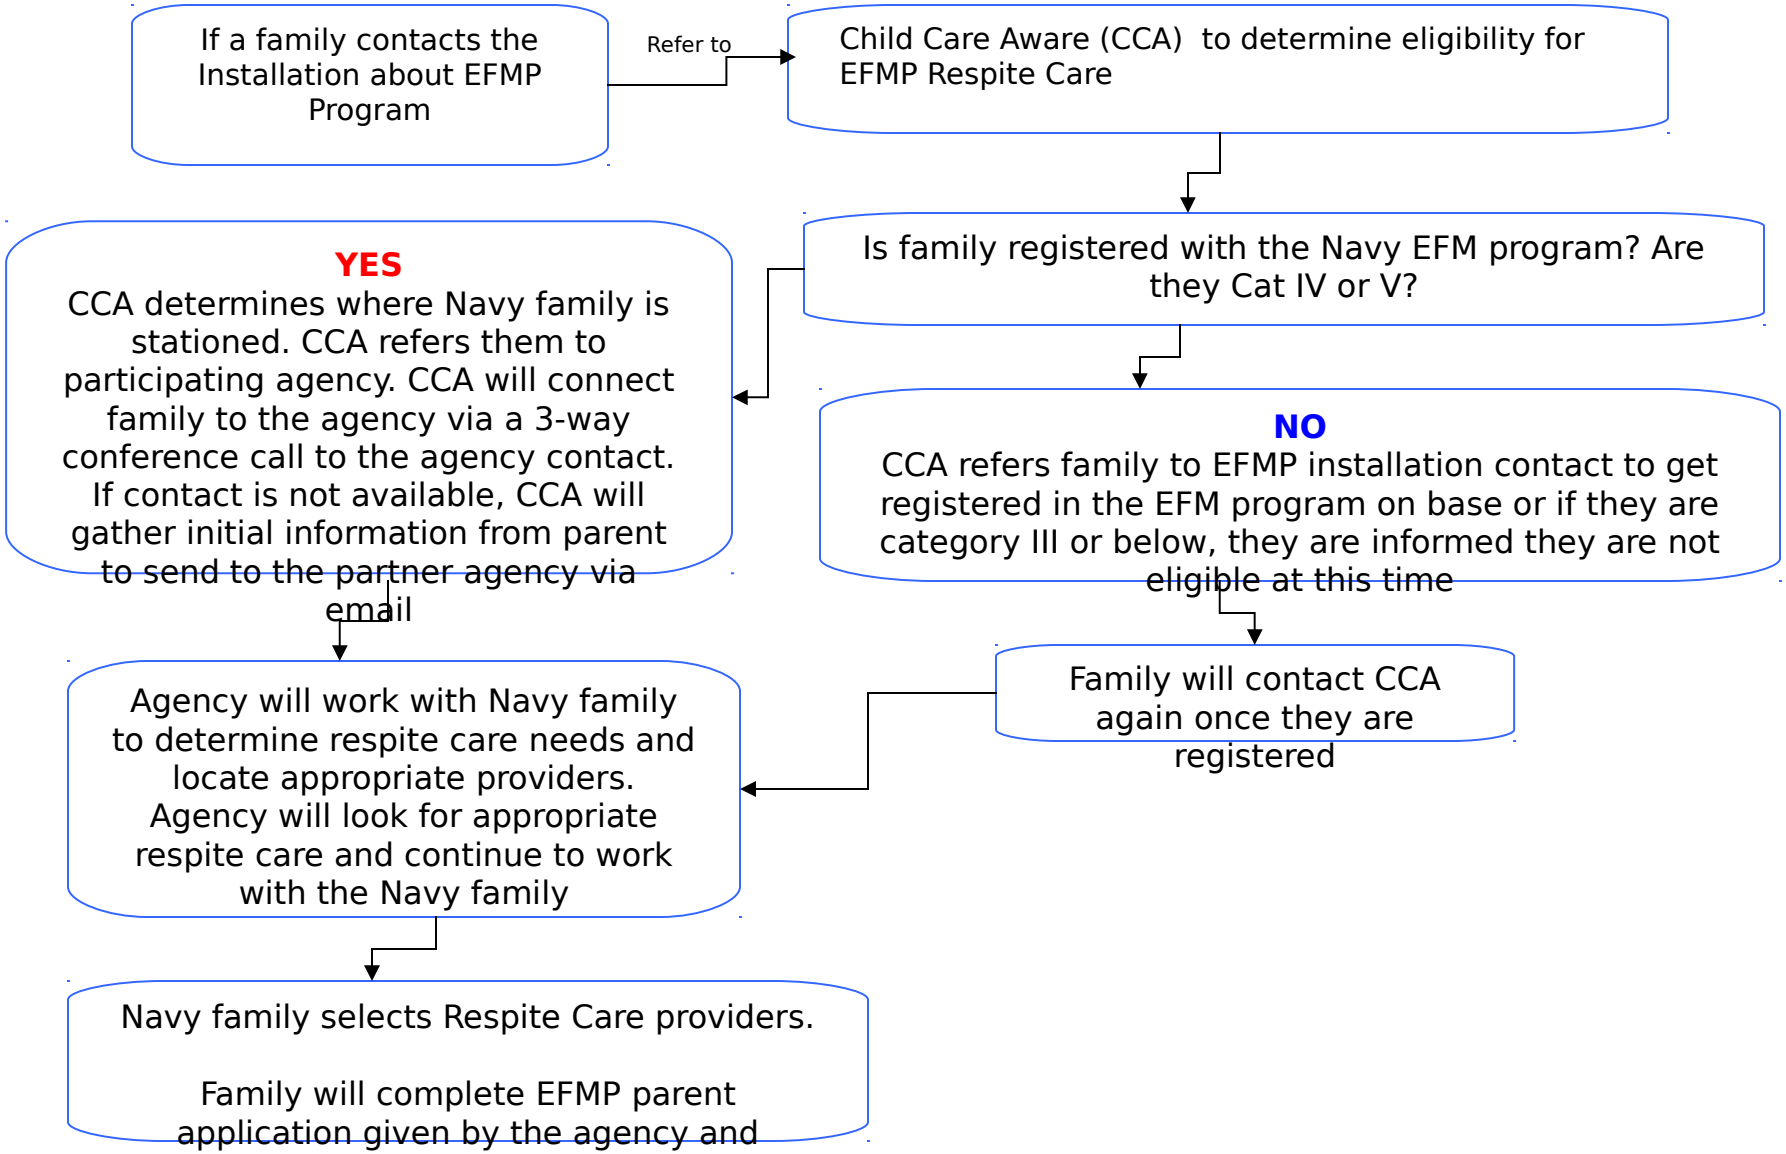
NACCRRA's Exceptional Family Member Program (EFMP)
Respite Care - Referral Process



If a family contacts the Installation about EFMP Program
Refer to
Child Care Aware (CCA) to determine eligibility for EFMP Respite Care
Is family registered with the Navy EFM program? Are they Cat IV or V?
YES
CCA determines where Navy family is stationed. CCA refers them to participating agency. CCA will connect family to the agency via a 3-way conference call to the agency contact. If contact is not available, CCA will gather initial information from parent to send to the partner agency via email
NO
CCA refers family to EFMP installation contact to get registered in the EFM program on base or if they are category III or below, they are informed they are not eligible at this time
Family will contact CCA again once they are registered
Agency will work with Navy family to determine respite care needs and locate appropriate providers. Agency will look for appropriate respite care and continue to work with the Navy family
Navy family selects Respite Care providers.
Family will complete EFMP parent application given by the agency and respite care will be provided.

Navy EFMP Respite Care Parent Testimony

"This respite program has been an essential part of my families' survival. With my husband on deployment and no family, this has been the only support that we have. I cannot express my gratitude enough for this program and all the help to support it. It means the world to me and my family!"

Navy EFMP Respite Care Parent Testimony

"We would never have been able to function without this program. My husband is completing a difficult residency and without this program, he would have not been able to focus on his current mission, as our entire family and support network is on the east coast. Thank you for this program!"
